Embalming Girl

Design: ゆお (Yuo)
Artwork: うすくち
Rules Manual (June 30, 2020)
3 to 6 Players, 10 Minutes, Ages 10+

- Contents:**
- 25 game cards
 - 1 Corpse Girl card
 - 2 Info cards

Game Idea:

An unknown virus that makes infected people violent has spread and the world has changed completely. A mob rushed to St. Lily's Girls Academy and the students fled to the old school building. There they remain hidden. The girls hold their breath and wait for rescue. In anxiety and fear, one of their friends died at dawn... they can't leave the corpse as it is as they don't know when help will come. The girls are divided into groups and try to embalm the corpses with the limited materials in the school while looking for clues to the murderer who may be hiding among them... in this game, the players become leaders of each team and give instructions to the team members (hands). The last hand is the leaders themselves. Will you be able to reach the truth of the incident and survive the tragedy?

Anatomy of Cards:

- ① Card strength (MP = Manpower)
- ② The name of the card.
- ③ This is the ability of the card that activates when used face up. There is also an ability to activate just by holding it.
- ④ Flavor text. Not directly related to the game.
- ⑤ Card victory conditions and priorities.
- ⑥ Number of identical cards (= people icons)

Game Preparation:

- ① Set the Target Value based on the number of the players: "9" for 3 players, "8" for 4 players, etc. (that is, Target Value = 12 – number of players). Place the corpse girl card in the center of the table, then overlay the front (blue) side of the info card to mark the Target Value (example shown is for 6 players). The second info card is a bonus.
- ② Adjust the number of cards according to the number of players. When playing with 4 or 6 players, remove 1 "Book Committee" to make a total of 24 cards. When playing 3 players, remove 1 each of "Co-workers", "Superior", "Public Committee", "Newspaper Club", and "Homecoming Club" to make 18 cards. When playing with 5 players, use all 25 cards.
- ③ Mix the game cards and distribute them evenly to each player (with 3-4 players: 6 cards, 5 players: 5 cards, 6 players: 4 cards each)
- ④ The player who has the "Student Organization Inside School" card will be the first player (just declare that you have it).

Flow of a Turn:

- ① Choose a card from your hand and pick one way to use it:

A. Special Skill: Place the card face up in front of you and apply the effect of the ability.

B. Embalming: Place the card face down on the side of the corpse girl. Place cards so that the order in which they were placed is known.

C. Suspicion: Place the card face down in front of another player. You cannot place suspicions on yourself.

- ② At the end of a turn, a player with only one card in hand is finished (temporary out of the game). After that, they will not take any more turns (their hand will be locked). However, **there are still suspicions**.

- ③ Pass the turn to the next player on the left. During the game, it will look like the following figure.

End of Game:

When all the players have finished playing, the game will be decided. Turn all the cards played to the embalming face up and add up the MP (Manpower). If the total value is equal to or higher than the Target Value on Corpse Girl card, the embalming is successful. Next, turn all the suspicion cards face up and add up the MPs against you. The player with the highest total allegations will be imprisoned. If players have the same value, both will be held. However, if everyone has the same value, no one will be charged (the total of allegations cannot be negative; if the total is < 1, it will be treated as 0). Finally, in victory condition priority order (increasing from 1), reveal your hand and determine if you have met its victory conditions. If the conditions are met, you immediately win, and the next person in priority order will not be checked (Did 1st priority wins? Yes → Victory, otherwise did 2nd priority win? Yes → Victory, etc. If there is a winner, the judgement is over. So, if you win first, then others cannot win). Of course, players with the same priority win (or lose) together. Also, you can participate in the victory judgement even if imprisoned.

Supplemental Rules:

If a card's ability cannot be used, it is skipped. For example, using the Lady when all other players hold only 1 card or using the Homecoming Department when there is no card in the embalming, etc. If you use an Infected Person and the next turn does not come, of course the ability does not apply. In other words, you cannot use the ability even if you use it when there are 2 cards left in your hand. If you use the ability of the Newspaper Club and the player to the left has 1 card in their hand, skip that player and go to the next player that has more than 1 card. Since the criminal card cannot be used, someone is always the criminal; however, due to the ability of the Homecoming Department, there is the possibility the criminal is applied to the embalming. In this case, the punch line is "There was no criminal, the girl died of illness". If the game ends with no winner, the game ends in annihilation.

Selection Rule:

If it's "less interesting that the last card is protected" and participants all agree, you can play in "Chaos Mode" where the final card's ability is applied. (A player normally doesn't play with only one card left).
